Communications are via a standard RS232C interface, and interface parameters can be set externally using front panel switches.

Brakebox Portable Impact Printer

What is The Brakebox Portable Impact Printer?

The Brakebox Portable Impact Printer enables you to have a hard, on the spot copy of your logged data.

The compact and lightweight design makes this printer an ideal choice for the track, the road and anywhere that portability is of the essence.

The Brakebox Portable Impact Printer provides twenty four characters per line, at speeds of up to 2.5 lines per second on standard 58mm width paper.

The printer is powered directly from the Brakebox, meaning that it will carry on printing for as long as you are logging data.

Features

- **Compact:** just 105mm (w) x 195mm (D) x 90mm (H)
- **Graphics:** Full dot addressable graphics.
- **Power:** Powered directly from the Brakebox unit.
- **Emulations:** Standard, Citizen 560/562 or Epson ESC/POS
- **Standard Interface:** RS232C
- **Diagnostic Mode:** Integral self-test and diagnostic mode.

Specifications
